SUMMARY

Skillful quality assurance engineer with core focus in writing automation test scripts and API functional testing. Currently working as quality assurance engineer consultant for Cognizant at Comcast Corporation. Hoping to transition into a developer role using my intensive knowledge in designing test scripts in Java and C# along with my web development in Ruby on Rails, as well as personal projects in HTML and JavaScript.

SKILLS

- Proficient in Java, Python, Selenium, and C#
- Basic skills in Ruby, JavaScript, and MySQL
- Developed test scripts, test cases and performed Manual and Automation Testing.
- Experienced working in Linux, MacOS, and Windows
- Strong oral and written communication, as well as problem solving
- Involvement with Agile teams and Scrum methodology
- Experience with automation tools such as Gherkin, Cucumber, and Specflow
- Developed test scripts to automate process of testing in Selenium WebDriver

EXPERIENCE

Cognizant Technology Solutions

Quality Assurance Engineer | Philadelphia, PA | June 2018 - Present

- Spearheaded as a QA Team lead on projects that help cut cost benefits by reducing use of call center agents. (Rally)
- Executed SOAP and REST API Testing using Postman, and SoapUI.
- Helped build a brand new automated unified framework across all Digital Order Entry platforms. (Java, Jenkins, and Selenium)
- Headed QA teams on Manual and Automation testing for bi-weekly company releases. (C#, Java)
- Coordinated and directed off-shore team with performance testing and accessibility testing.

Jed Mahonis Group

Server Developer Intern | Minneapolis, MN | April 2017 – August 2017

- Developed and built a Ruby on Rails application for the quality assurance team from the ground up. (MySQL, Ruby, HTML, CSS, JavaScript)
- Improved and maximized quality assurance time, by developing a web application that generates reports on mobile applications currently being built by the company.
- Spearheaded and launched this application as a remote intern on a one-man team.
- Incorporated slack notifications using Jenkins plugins to send over fast and quick reports to optimize production

Sportradar

Data Entry Specialist | Minneapolis, MN | October 2014 – January 2018

- Monitored up to six live sporting events at one time while collecting raw, accurate data for over 500 clients including NFL, NHL, Google, and Draft Kings to publish on their websites
- Supervised and assisted up to six live data entry field workers internationally simultaneously resulting in accurate data that covers team and individual statistics.

EDUCATION

University of Minnesota

Bachelor of Arts | Twin Cities, MN | Graduation: December 2017

- Major: Computer Science
